

LiceKiller™

Home Environment Kit Instructions

➔ Prior to use of our Home Environment Kit please gather ALL unnecessary clothing and fiber based toys that will not be needed for about 3 weeks, store in plastic bags and place in garage. After 3 weeks having passed, any lice or nits that were trapped in the bags will have died and will no longer be a threat to you or your children.

Bagging and storing your items cuts down on the amount of items needed to be treated and sprayed within the home.

Re-Infestations happen... Our best advice is to conduct regular inspections and teach your children not to touch heads with their friend's head, share brushes, combs, scarves, or hats. Make sure to spray and wash anything and everything that could have a fallen hair follicle on it. Also, inspect frequently to prevent re-infestation!

If you have any questions regarding these instructions, please call **Access Nutraceuticals at 1-800-653-9053** or **(559)635-0500**. Business hours are from **8am to 5pm Pacific Time** and **11am to 8pm Eastern Time**.

You may also email us with your questions at **Service@Accessnutraceuticals.com**

Bug Killer Laundry Concentrate

- Gather all clothing and bedding and wash with Laundry Concentrate.
- Add 1-2 oz. (2-3 Tablespoons) of Bug Killer Laundry Concentrate per wash load in warm water only. You may also add your favorite laundry detergent like Tide or Clorox. Enzymes work best in warm water.
- Set washer to warm water; not hot or cold water cycle options.
- Use dryer as necessary; all mites and eggs are already dead in wash cycle.
- Laundry Concentrate will dissolve bugs, parasites, eggs/nits, fungus, grease and other organic matter. It cleans and deodorizes without harsh chemicals.

Furniture Spray Concentrate

- Empty contents of one 2oz Furniture Spray Concentrate (Blue Bottle) into an empty 24 oz. spray bottle provided.
- Fill the remainder of the spray bottle with warm tap or distilled water. Ideal temperature is 98 degrees Fahrenheit.
- Attach the spray gun nozzle, set nozzle tip to a light mist, and use.
- Spray fiber-based (cloth upholstery) furniture, chairs, carpets, throw rugs, bed mattresses, car seats and or carpeted floor mats, backpacks and even vacuum cleaner head and brush after use.
- Pay special attention to mattresses and the "foot-print" area around bed.
- Vacuum entire home to the best of your ability.
- Repeat daily for a minimum of 2 weeks.
