

# LiceKiller™

## LiceKiller Instructions

- ➔ Prior to use of LiceKiller, thoroughly wash hair to remove all hair products and/or any previously used pesticide based treatments.

If you have any questions regarding these instructions, please call **Access Nutraceuticals at 1-800-653-9053 or (559)635-0500**. Business hours are from **8am to 5pm Pacific Time and 11am to 8pm Eastern Time**.

You may also email us with your questions at **Service@Accessnutraceuticals.com**

## 1 Step One: Nit Glue Dissolver

- Separate hair into small sections.
- Spray Nit Glue Dissolver to separated sections, apply directly on scalp and saturate hair approximately 1-2 inches from scalp.
- During application, massage Nit Glue Dissolver into scalp to penetrate all areas.
- Leave Nit Glue Dissolver on hair for approximately 5-10 minutes.
- Then using your Nit Free Lice Comb, begin combing through hair. Comb hair running the teeth of the Nit Free Lice Comb directly against the scalp in a "scooping" manner. Thoroughly comb all sections of hair until complete.

***Do not rinse before proceeding to step two.***

## 2 Step Two: LiceKiller Oil Treatment

- Begin applying LiceKiller Oil Treatment to hair, assuring that you completely cover and fully saturate all strands from top to bottom.  
***DO NOT LEAVE ANY DRY SPOTS!***
- Place shower cap over hair. Leave shower cap on for approximately 30 minutes. For best results, we recommend one hour.
- Bending over a sink/bathtub, drape a towel across your shoulders, remove the shower cap, and with your Nit Free Lice Comb begin thoroughly combing the hair clean. Comb the hair in a "scraping" manner along the scalp. **TAKE YOUR TIME**. It is essential that all nits are removed from the scalp and hair. Once you have thoroughly combed all sections of hair and find no more nits, you are finished.
- You may now wash and rinse your hair with your everyday shampoo.

***(Note: It may take several shampoos to get the oil-based product completely out of your hair. If you do not feel confident that you have removed all the lice and nits after completing steps one and two, you may repeat as desired).***

## 3 Step Three: Lice Repellant

- ***Lice Repellant is used as an additional measure to prevent re-infestation, both in and out of the home. Use Lice Repellant daily when sending your children off to school or out to play. Be vigilant and check for lice and nits even after use of this product. Reinfestation may occur from an outside source.***
- When applying Lice Repellant to the hair, hold spray nozzle approximately 6-8 inches away from head and lightly spray hair. You may also manually apply Lice Repellant with fingers, rubbing behind the ears and along the neckline. It is not necessary or recommended that you drench the hair as the repellant is an oil based solution and a little goes a long way.
